SKILLS

Programming, Optimization,
Debugging, Multithreading, OOP,
DOD, UX, UI

Programming Languages

C++	6 years	Advanced/Expert
C#	5 years	Advanced
Java	3 years	Advanced
Python	3 years	Advanced
JavaScript	2 years	Intermediate
MIPS	1 year	Intermediate/Novice

Game Engines & Graphics API

Unity, Unreal, Godot, Game Maker (GMK)
DirectX11, OpenGL
GLSL, GLSL ES, HLSL

Soft Skills

Communicative, Flexible / Adaptative,
Fast Learner, Technical & Design mix,
Theory & Practice mix

Languages

French	Native Language
English	Fluent
Japanese	Notions
German	Notions

Point of interests / Hobbies

Real time rendering, Engine/ Low level programming.	Video games (Sandbox, Roguelikes, ARPG..) Music, TV Shows, Manga & Anime
--	--

GRAVERET NICOLAS

Video Games Programmer

EDUCATION

2025 - 2026 | Computer Science / Video games engineering Masters 2

Université Lumière Lyon 2 (France)

- **Game engines** : Unity/Unreal Godot
- **CGI** : 3D, Real Time, Physics, PBR
- AI, Game Design, English

2022 - 2023 | Human-Computer Interaction (HCI) Internation Masters 1

Université Paris-Saclay (France)

- **Extended reality** : Virtual, Mixed & Augmented Reality
- **Human-Computer interaction** fundamentals
- **Design & Evaluation** of interactive systems
- **User Experience & User Interface**
- **Web** development

2019 - 2022 | Double Bachelor's Degree in Computer Science & Mathematics

Université Paris-Saclay (France)

- **Computer Science** : CGI, Functional, imperative & concurrent programming. AI & Statistical learning. Optimization & Software Engineering. Theory, Logic, Graphs, Compilation & Operating systems. Databases.
- **Mathematics** : Calculus, linear algebra, Analysis & Numerical analysis, Statistics & Probabilities, Computer assisted proofs.
- Others : Ecology, English, Professional project.

2019 | High School Diploma (High honors)

Lycée les 7 mares

EXPERIENCES

2022 - 2025 | Portfolio / Projects <https://neylick.net>

2025 : Radiance cascades (**GLSL/GLSL ES, GameMaker**, Graphics)
2024-5 : "SCP-G" (**Unreal Engine, C++**, Platformer)
2023-4 : "RogueCoon" (**C++**, **OpenGL**, **Custom Engine**, Rogue-Like)
2023 : "Asteroids" remake (**C++**, **DirectX11**, **Custom Engine**)
2022 : **Texturing/Materials** experiments (**Java/Processing**, Graphics)

2022 | Internship (2 month)

Team VENISE @ LISN

"Absence in **Collaborative Extended Reality**"

C# & Unity, Replay System, **3D/6DoF**, **3 users**, **Audio** communication

2020 | Quality Advisor / Programming assistance

Terror Dog Studio (Indie Game Developers)

Debug, Play & limit tests, Design Research & Pitch, Localization.

2019 - 2023 | Class Projects

- **XR** Fruit Ninja/Cooking mama (**C#**, **Unity**)
- "Slither.io" remake (**Java/Processing**, Graphics)
- "Dwarf vs Goblins" (**Java**, Defense mini-game, **Multi-threaded**)
- Tabletop Games (**C++**, **Java**, **AI** navigation & decision trees)
- Interactive map (**NodeJS**, **web**)

CERTIFICATIONS

2022 | Cambridge - Linguaskill (180+/180) - English C1 Certificate

2019 | TOEIC (890/990) - English C1 Certificate
